## Model 96 - 304SS Whale Rice Grain Black Diamond Collection Sink

### Core Anti-Clogging & Debris Collection System:

1. Side debris basket: The drain is located on the side with a removable double-layer basket to efficiently trap food waste and prevent clogging. It is more hygienic without needing to clean by hand.
2. Slope drainage: 70° sloped bottom with guide grooves and 140mm large drain for fast water flow and no standing water. A knob on the sink allows water retention for washing.
3. Anti-odor & silent drain pipe: Blocks sewer odors and reduces noise.
4. By relocating the drain and debris area to the side, the main working space in the center is fully released, combining excellent appearance and practicality.
